

SOCIAL ENGINEERING

Do not get tricked into sharing sensitive and personal information over social media.

STOP

- Responding to strangers online asking you to share OTP.
- Clicking on pop-up banners claiming your computer is infected.
- Entertaining friendly callers from getting your personal information by gaining your trust.
- Acting upon mails or messages that create urgency to take action.

THINK

- Could this be genuine?
- Is it safe to share personal information with a stranger?
- Will your bank call to ask for your personal information?

PROTECT

- Do not share your OTP or personal information.
- Limit the information you share on any digital channel.
- Create strong and complex passwords and change them frequently.
- Do not download or install suspicious apps.
- If you suspect that your personal details have been compromised, report it immediately to your bank.
